

FF Corse has teamed up with Stand 21 UK to offer their drivers the most advanced race wear on the market today. As you would expect, the suits and helmets are made-to-measure, giving optimum comfort and safety, a prerequisite for any racing driver. Please take time to read through the product range description available from FF Corse, to better understand why the partnership has been created with Stand 21UK.

Suits

NEW!

FFC121 Entry level suit, very robust material, 3 layers with stretchable panel on the back, and floating sleeves.

FFC221 Amazing breathable and looking fabric with only 2 layers, comes with full floating sleeves and the fabric helps transfer body heat

NEW!

FFC221 EVO The evolution of the FFC221 ! Same material, but comfort and fitting increased by a new pattern and a stretchable panel.

FFC3000 The most breathable suit offered in the world ! The FFC3000 made with stretchable 2 layers materials brings you a large freedom of movement. The perfect suit for endurance racing series and hot weather. Optional Air Force attachment available.

NEW!

FFC221 AIR-S Extremely light, made with a brand new material, this suit is the most breathable light fabric suit you can find. It comes with 3 layers, stretchable panel, floating sleeves and a stunning cut. A must have !

Model shown is based on a black FFC121 suit and features floating sleeves, stretchable panel on the back and is the most robust made-to-measure race suit available today...

//Boots

The FF Corse boost follow the same design cues as the suit. There is space available on the strap to have your name embroidered if you wish. The boot itself is constructed from high quality leather and features an anti vibration sole and shock absorbing heel.

The FFC Daytona II is our most popular selling boot and offers exceptional comfort.

//Gloves

FFC Daytona & FFC OSII Much like the FF Corse boots, the gloves follow the same design theme and, again, there is space available on the strap to have you name embroidered if you wish. The gloves are available with inside and outside seams to reach every drivers requirements.

//Hans Device

Hans Device Quietly introduced almost ten years ago, the HANS Device helps protect the racing driver from a basilar skull fracture - motorsport's most common killer. Stand 21 is the world's largest manufacturer of the HANS Device, which is now mandatory in the majority of international FIA events. It is available in five inclines with three widths - so speak to your Stand 21 representative for advice on choosing the right product for your car.

Starting from £258

//IVOS Helmet

Snell & FIA 8860 Stand 21 made its first helmet in 1991 and, like many of its products, it would revolutionise how racing drivers' are protected. To this day Stand 21 has only ever created carbon fibre safety helmets - due to its strength qualities - and continues to with its latest creation, the IVOS. Short for 'Improved Vision, Optimised Safety' the IVOS has a very wide aperture and sculpted back to accommodate the introduction of a HANS Device (see above) without sacrificing driver comfort. Safety is paramount, combined with the strong carbon fibre outer shell, is a unique liner used only by Stand 21. Created from Arpro EPP, the material has a memory like property for maximum protection against multiple impacts, a product that no other helmet manufacturer utilises. With a full made-to-measure interior, the IVOS is the safest helmet on the market today...

Handmade in Stand 21 factory in Dijon, you have the possibility to ask for your own design.

Starting from £1325
